### **1** General Specifications

	Feature	Spec		
	Size	8 inch		
	Resolution	1024RGB×768		
	Technology Type	a-Si		
Display Spec.	Pixel Configuration	R.G.B. Stripe		
Display Opec.	Pixel pitch(mm)	0.158(H) ×0.158(V)		
	Display Mode	SFT		
	Surface Treatment	AG		
	Viewing Direction	All		
	LCM (W x H x D) (mm)	183.43×138.35×3.75		
	Active Area(mm)	162.05 × 121.54		
Mechanical	With /Without TSP	Without TSP		
Characteristics	Matching Connection Type	ZIF		
	LED Numbers	27 LEDS		
	Weight (g)	TBD		
	Interface	LVDS		
Electrical Characteristics	Color Depth	16.7M		
	Driver IC	RM51150+HX8684B		

Note 1: Viewing direction for best image quality is different from TFT definition. There is a 180 degree shift.

Note 2: Requirements on Environmental Protection: Q/S0002

Note 3: LCM weight tolerance: ± 5%

The information contained herein is the exclusive property of TIANMA MICRO-ELECTRONICS Corporation and shall not be distributed, reproduced, or disclosed in whole or in part without prior written permission of TIANMA MICRO-ELECTRONICS Corporation.

4.3 Recommended Driving Condition for Backlight

Model No. TM080TDGP02-00

						Ta=25℃
ltem	Symbol	Min	Тур	Мах	Unit	Remark
Forward Current	١ <sub>F</sub>	-	180	225	mA	27LEDs
Forward Voltage	V <sub>F</sub>	8.4	9.3	10.2	V	(3 LED Serial, 9
Backlight Power Consumption	WBL	-	1.674	2.295	W	LED Parallel)
Operating Life Time	-	20,000	30,000	-	Hrs	I <sub>F</sub> =20mA

Note1: The LED driving condition is defined for each LED module (3 LED Serial, 9 LED Parallel). For each LED:  $I_F$  (1/9) =20mA,  $V_F$  (1/3) =3.1V.

Note2: Under LCM operating, the stable forward current should be inputted. And forward voltage is for reference only.

Note3: I<sub>F</sub> is defined for one channel LED.Optical performance should be evaluated at Ta=25°C only If LED is driven by high current, high ambient temperature & humidity condition. The life time of LED will be reduced.Operating life means brightness goes down to 50% initial brightness. Typical operating life time is estimated data.

Note4: The LED driving condition is defined for each LED module

Test Conditions:

- 1. IF= 180 mA, and the ambient temperature is  $25^{\circ}$ C.
- 2. The test systems refer to Note 1 and Note 2.

The information contained herein is the exclusive property of TIANMA MICRO-ELECTRONICS Corporation and shall not be distributed, reproduced, or disclosed in whole or in part without prior written permission of TIANMA MICRO-ELECTRONICS Corporation.

Page 15 of 23

Note 1: Definition of optical measurement system.

The optical characteristics should be measured in dark room. After 5 Minutes operation, the optical properties are measured at the center point of the LCD screen. All input terminals LCD panel must be ground when measuring the center area of the panel.

Note 2: Definition of viewing angle range and measurement system.

viewing angle is measured at the center point of the LCD.

Note 3: Definition of contrast ratio

Contrast ratio (CR) =  $\frac{\text{Luminance measured when LCD is on the "White" state}}{\text{Luminance measured when LCD is on the "Black" state}}$ 

"White state ": The state is that the LCD should drive by Vwhite.

"Black state": The state is that the LCD should drive by Vblack.

Vwhite: To be determined Vblack: To be determined.

The information contained herein is the exclusive property of TIANMA MICRO-ELECTRONICS Corporation and shall not be distributed, reproduced, or disclosed in whole or in part without prior written permission of TIANMA MICRO-ELECTRONICS Corporation.

Page 16 of 23

#### Model No. TM080TDGP02-00

Note 4: Definition of Response time

The response time is defined as the LCD optical switching time interval between "White" state and "Black" state. Rise time  $(T_{ON})$  is the time between photo detector output intensity changed from 90% to 10%. And fall time  $(T_{OFF})$  is the time between photo detector output intensity changed from 10% to 90%.

Note 5: Definition of color chromaticity (CIE1931)

Color coordinates measured at center point of LCD.

Note 6: Definition of Luminance Uniformity

Active area is divided into 9 measuring areas (Refer Fig. 2). Every measuring point is placed at the center of each measuring area.

Luminance Uniformity (U) = Lmin/ Lmax

L-----Active area length W----- Active area width

Lmax: The measured Maximum luminance of all measurement position.

Lmin: The measured Minimum luminance of all measurement position.

Note 7: Definition of Luminance:

Measure the luminance of white state at center point.

The information contained herein is the exclusive property of TIANMA MICRO-ELECTRONICS Corporation and shall not be distributed, reproduced, or disclosed in whole or in part without prior written permission of TIANMA MICRO-ELECTRONICS Corporation.

#### 7 Environmental / Reliability Test

Model No. TM080TDGP02-00

/ L	Environmental / Reliability Test									
No	Test Item	Condition	Remarks							
1	High Temperature Operation	Ta = +70℃, 240 hours (Note1)	IEC60068-2-1:2007 GB2423.2-2008							
2	Low Temperature Operation	Ta = -20℃, 240 hours (Note2)	IEC60068-2-1:2007 GB2423.1-2008							
3	High Temperature Storage	Ta = +80℃, 240 hours	IEC60068-2-1:2007 GB2423.2-2008							
4	Low Temperature Storage	Ta = -30℃, 240 hours	IEC60068-2-1:2007 GB2423.1-2008							
5	Storage at High Temperature and Humidity	Ta = +60℃, 90% RH max, 240hours	IEC60068-2-78 :2001 GB/T2423.3—2006							
6	Thermal Shock (non-operation)	-30℃ 30 min ~ +80℃ 30 min, Change time:5min, 100 Cycle	Start with cold temperature, End with high temperature, IEC60068-2-14:1984,G B2423.22-2002							
7	ESD	C=150pF, R=330Ω, 5point/panel Air: ±8Kv, 5times; Contact: ±4Kv, 5times (Environment: 15℃~35℃, 30%~60%. 86Kpa~106Kpa)	IEC61000-4-2:2001 GB/T17626.2-2006							
8	Vibration Test	5Hz~20Hz~200Hz, 0.01g2/Hz~0.01g2/Hz~0.001g2/Hz,X/Y/Z 各轴 30min	GB/T 4857.23-2012							
9	Package Drop Test	Drop 1 corner, 3 edges, 6 surfaces from height of 80cm (Weight≦10kg); of 60 cm (Weight>10kg)	GB/T 4857.5-1992							

Note1: Ta is the ambient temperature of sample.

Note2: Before cosmetic and function test, the product must have enough recovery time, at least 24 hours at room temperature.

Note 3: In the standard condition, there shall be no practical problem that may affect the display function. After the reliability test, the product only guarantees operation, but don't guarantee all of the cosmetic specification.

#### **10** Precautions for Use of LCD Modules

10.1 Handling Precautions

10.1.1 The display panel is made of glass. Do not subject it to a mechanical shock by dropping it from a high place, etc.

10.1.2 If the display panel is damaged and the liquid crystal substance inside it leaks out, be sure not to get any in your mouth, if the substance comes into contact with your skin or clothes, promptly wash it off using soap and water.

10.1.3 Do not apply excessive force to the display surface or the adjoining areas since this may cause the color tone to vary.

10.1.4 The polarizer covering the display surface of the LCD module is soft and easily scratched. Handle this polarizer carefully.

10.1.5 If the display surface is contaMinated, breathe on the surface and gently wipe it with a soft dry cloth. If still not completely clear, moisten cloth with one of the following solvents:

Isopropyl alcohol

Ethyl alcohol

Solvents other than those mentioned above may damage the polarizer. Especially, do not use the following:

- Water
- Ketone
- Aromatic solvents
- 10.1.6 Do not attempt to disassemble the LCD Module.
- 10.1.7 If the logic circuit power is off, do not apply the input signals.

10.1.8 To prevent destruction of the elements by static electricity, be careful to maintain an optimum work environment.

10.1.8.1 Be sure to ground the body when handling the LCD Modules.

10.1.8.2 Tools required for assembly, such as soldering irons, must be properly ground.

10.1.8.3 To reduce the amount of static electricity generated, do not conduct assembly and other work under dry conditions.

10.1.8.4 The LCD Module is coated with a film to protect the display surface. Be care when peeling off this protective film since static electricity may be generated.

10.2 Storage precautions

10.2.1 When storing the LCD modules, avoid exposure to direct sunlight or to the light of fluorescent lamps.

10.2.2 The LCD modules should be stored under the storage temperature range. If the LCD modules will be stored for a long time, the recommend condition is:

Temperature :  $0^{\circ}$ C  $\sim 40^{\circ}$ C Relatively humidity:  $\leq 80\%$ 

10.2.3 The LCD modules should be stored in the room without acid, alkali and harmful gas.

10.3 Transportation Precautions

10.3.1 The LCD modules should be no falling and violent shocking during transportation, and also should avoid excessive press, water, damp and sunshine.

The information contained herein is the exclusive property of TIANMA MICRO-ELECTRONICS Corporation and shall not be distributed, reproduced, or disclosed in whole or in part without prior written permission of TIANMA MICRO-ELECTRONICS Corporation.
